5M H.265 Network IR Camera

5M H.265 IR Camera Series

5M High resolution with 40% lower bandwidth costs

Samsung's high resolution 5M camera supports the latest video compression format H.265 to satisfy increasing demand for large scaled areas. Large scaled applications such as city, harbor or airports demand high quality details while struggling with the shortage of bandwidth and storage. Now benefit crystal clear images with 40% lower bandwidth and storage size by SNO-8081R & SNV-8081R.

- 5M 30fps
- True WDR 120dB
- H.265, H.264, MJPEG support
- WDR(120dB), Simple focus, P-Iris
- IR Viewable length 30m
- Hallway view (Rotate 90° / 270°)
- LDC (Lens Distortion Control)
- IP66, IK10, Bi-directional audio support

Lower 40% Bandwidth & Storage costs with H.265

The new H.265 codec format adapted in SNO-8081R & SNV-8081R has 40% bit rate reduction while offering the same image quality compared to H.264 by using a more efficient compression technology. This means that the camera could also offer a significantly better image quality than H.264 with the same bandwidth or storage needs.

Now monitor high quality images without sacrificing video quality.

0Lux, IR Viewable Length 30m

SNO & SNV-8081R offers built-in IR LED allowing users to discover objects clearly in no light conditions and provides views from up to 30 meters away. Your safety will be ensured with the high video quality even in total darkness.

30fps@5Megapixel Resolution

Samsung's 5M H.265 IR cameras have the ability to shoot 30 frames per second at 5MP high resolution with its powerful encoding technology. It has faster frame rate than the conventional 5M cameras allowing users to get sharp and clear videos with fast moving objects.

P-Iris Lens Support

The P-iris system prevents the blurred image that may occur when multiple light conditions exist by optimizing the iris function. As a result, you can shoot high quality images with better contrast, clarity, resolution and depth of field.

Hallway view for monitoring vertical shaped areas

In a vertical shaped environment, such as corridors, hallways, tunnels, or aisles, traditional horizontal shaped videos focus on unnecessary edges of the area causing bandwidth and storage waste. By utilizing the hallway view, 3 : 4 and 9 : 16 aspect ratio image is created : a vertically oriented video that maximizes image quality in narrow locations.

Minimize image distortion by Lens Distortion Correction

Lens Distortion may typically appear in videos causing straight lines close to the edge curve outwards. With the Lens Distortion Correction technology available on the WiseNet Lite series, imperfections in images can be easily repaired.
